

## **Welcome to The Medical Home Team!**

As a patient, you will soon experience what everyone has been talking about... modern medicine in the comfort and convenience of your home. The Medical Home Team (TMHT) is a medical practice composed of highly trained and compassionate providers that specialize in treating patients in their home setting. Our physicians and their experienced staff are all available in helping to care for the patient's needs.

Our doctors provide most levels of medical care, from regular exam to complex treatment plans, all in the comfort of your home. If a patient should need hospitalization, TMHT coordinates the admission process with the hospital of the patient's choice. Upon discharge, TMHT will coordinate a visit to help transition the patient back in the home.

Our goal is to touch more lives through quality medicine and compassionate services, our doctors help ease the burden of those having difficulty going to a doctor's office. TMHT is proud to help patients stay in their homes longer, providing high levels of care, all in the home.

Our staff aim to provide personal service that treats every patient with respect and dignity. We thank you for allowing The Medical Home Team to be your primary doctor.

### **IMPORTANT INFO.... Save this info for later!!**

- the doctor will visit you on a regular basis as often as is medically necessary.
- We will attempt to make a house call within 48 hrs of a request. Sooner if possible.
- we will call and remind you of the visit.
- we will give you a time range that we will arrive and be as close as possible. We can be exact due to traffic, unexpected emergencies ect.
- if you have been in the hospital, call us on the day of discharge for continuing care.
- med refills will be called in during your visit.
- Home Health nurses are welcome to contact us at any time
- TMHT does not make emergency visits, In the event of a true emergency call 911 or go to the hospital. If you are admitted contact us so we can provide the necessary info to the hospital.

### **BEFORE EVERY DOCTOR VISIT**

- if you have a caretaker have them available.
- gather all your medication for the doctor to review
- If you are being seen by Home Health Providers have any paperwork available.

**If you have any questions or concerns please call our office.  
We want to do everything we can to help you!!**
